INDEX TO VOLUME 71

*Starred items are "Shorter Notes"

Ahmad, Shair and Travis, C. C. *Oscillation criteria for second-order differential systems*, 247.

Amir, Dan and Deutsch, Frank. *Another approximation theoretic characterization of inner product spaces*, 99.

Anantharaman, R. *Addendum to "The range of a vector measure has the Banach-Saks property"*, 359.

Arnold, Edward M. *Computable isomorphism invariants for the fundamental group of the complement of a plane projective curve*, 345.

Askey, Richard. *Jacobi's generating function for Jacobi polynomials*, 243.

Bank, Steven B. *A general result regarding the growth of solutions of first-order differential equations*, 39.

Bell, Harold and Dickman, R. F., Jr. *A counterexample to a conjecture of A. H. Stone*, 305.

Berberian, S. K. *Extensions of a theorem of Fuglede and Putnam*, 113.

———. *A note on the disintegration of measures*, 115.

Berstein, I. and Dror, E. *On the homotopy groups of one point union with a bouquet of circles*, 321.

Bochnak, Jacek. *Sur le 17ème problème de Hilbert pour les fonctions de Nash*, 183.

Bowen, Rufus. *Markov partitions are not smooth*, 130.

Bunce, John W. and Paschke, William L. *Quasi-expectations and amenable von Neumann algebras*, 232.

Carrig, J. E. and Vasconcelos, W. V. *Projective ideals in rings of dimension one*, 169.

Cartwright, D. I. and Field, M. J. *A refinement of the arithmetic mean-geometric mean inequality*, 36.

Chavel, Isaac. *On A. Hurwitz' method in isoperimetric inequalities*, 275.

Chen, Bang-yen. *Euler characteristics and codimensions of complete intersections*, 13.

Chen, Su-Shing. *On the fundamental group of a compact negatively curved manifold*, 119.

Daverman, Robert J. *Crumpled cubes that are not highly complex*, 325.

Davis, Donald M. and Mahowald, Mark. *A nondesuspension theorem for stunted real projective spaces*, 143.

Deutsch, Frank. See Amir, Dan.

Devaney, Robert L. *Subshifts of finite type in linked twist mappings*, 334.

Dickman, R. F., Jr. See Bell, Harold.

Dror, E. See Berstein, I.

Faulkner, G. D. and Huneycutt, J. E., Jr. *The canonical form of a scalar operator on a Banach space*, 81.

Field, M. J. See Cartwright, D. I.

Fleissner, William G. *Some spaces related to topological inequalities proven by the Erdös-Rado theorem*, 313.

Friedler, Louis M. *Resolutions of H-closed spaces*, 309.

Fryant, Allan J. *Extension of Privaloff's theorem to ultraspherical expansions*, 49.

Geoghegan, Ross. *Fibered stable compacta have finite homotopy type*, 123.

Grabiner, Sandy. *Ascent, descent, and compact perturbations*, 79.

Gwinner, J. *On the convergence of some iteration processes in uniformly convex Banach spaces*, 29.

Hale, Mark P., Jr. and Jungnickel, Dieter. *A generalization of Singer's theorem*, 280.

Hall, F. J. See Hartwig, R. E.

Hartwig, R. E. and Hall, F. J. *Pseudo-similarity for matrices over a field*, 6.

Herrero, Domingo A. *Almost every quasinilpotent Hilbert space operator is a universal quasinilpotent*, 212.

Hess, H. U. *On a theorem of Cambern*, 204.

Hopenwasser, Alan. *Boundary representations and tensor products of C*-algebras*, 95.

Horowitz, David. *A further refinement for coefficient estimates of univalent functions*, 217.

Hess, H. U. *On a theorem of Cambern*, 204.

Hopenwasser, Alan. *Boundary representations and tensor products of C*-algebras*, 95.

Horowitz, David. *A further refinement for coefficient estimates of univalent functions*, 217.

Huneycutt, J. E., Jr. See Faulkner, G. D.
Hunter, R. P. *Certain idempotents lying in the centralizer of the group of units*, 339.
Janos, Ludvik and Solomon, J. L. *A fixed point theorem and attractors*, 257.
Johnson, Jimmie Lee. *The uniform continuity of certain translation semigroups*, 197.
del Junco, A. and Steele, J. Michael. *Growth rates for monotone subsequences*, 179.
Jungnickel, Dieter. See Hale, Mark P., Jr.
Kidwell, Mark E. *On the Alexander polynomials of certain three-component links*, 351.
Kim, Ki Hang and Roush, Fred W. *On groupoids defined by commutators*, 15.
Kimura, Shigeru. *Entire functions with almost radially distributed values*, 73.
Kuan, Shen-Yue. *On the inset of a convergence domain*, 241.
Kung, Joseph P. S. *Alternating basis exchanges in matroids*, 355.
Lemaire, Luc. *Harmonic nonholomorphic maps from a surface to a sphere*, 299.
Lichtman, A. I. *Free subgroups of normal subgroups of the multiplicative group of skew fields*, 174.
Liu, Tai-Ping. *Invariants and asymptotic behavior of solutions of a conservation law*, 227.
Loeb, Peter A. *A generalization of the Riesz-Herglotz theorem on representing measures*, 65.
McCoy, R. A. *Submetrizable spaces and almost σ-compact function spaces*, 138.
Magid, Andy R. *Brauer groups of linear algebraic groups with characters*, 164.
Mahowald, Mark. See Davis, Donald M.
Masat, F. E. *Proper regular semigroups*, 189.
Mena, R. and Roth B. *Homomorphisms of lattices of continuous functions*, 11.
Metropolis, N., Rota, Gian-Carlo, Strehl, Volker and White, Neil. *Partitions into chains of a class of partially ordered sets*, 193.
Micchelli, Charles A. *A characterization of M. W. Wilson's criterion for nonnegative expansions of orthogonal polynomials*, 69.
Miers, C. Robert. *Lie triple derivations of von Neumann algebras*, 57.
Molzon, Robert E. *Capacity and equidistribution for holomorphic maps from* $\mathbf{C}^2$ *to* $\mathbf{C}^2$, 46.
O'Brien, Robert E., Jr. *Contraction semigroups, stabilization, and the mean ergodic theorem*, 89.
Ôta, Schôichi. *Locally closedness of unbounded derivations in C*-algebras*, 222.
Paschke, William L. *Inner amenability and conjugation operators*, 117.
———. See Bunce, John W.
Patadia, J. R. *On the absolute convergence of lacunary Fourier series*, 19.
Pavlakos, Panaiotis K. *The Lebesgue decomposition theorem for partially ordered semigroup-valued measures*, 207.
Payne, Stanley E. *An inequality for generalized quadrangles*, 147.
Rabinowitz, Joshua H. *Moišezon spaces and positive coherent sheaves*, 237.
Raeburn, Iain. *K-theory and K-homology relative to a* Π_∞*-factor*, 294.
Reiten, Idun. *A note on stable equivalence and Nakayama algebras*, 157.
Rindler, Harald. *Approximate units in ideals of group algebras*, 62.
Robbins, Steven. *A generalization of the canonical commutation and anticommutation relations*, 85.
Rota, Gian-Carlo. See Metropolis, N.
Roth, B. See Mena, R.
Roush, Fred W. See Kim, Ki Hang.
Sarbadhikari, H. *A selection theorem for multifunctions*, 285.
Sarkhel, D. N. *A criterion for Perron integrability*, 109.
Schweiger, F. *tan x is ergodic*, 54.
Shapiro, George S. *Balayage by Fourier transforms with sparse frequencies in compact abelian torsion groups*, 253.
Shapiro, H. L. and Smith, F. A. *Neighborhoods of the diagonal and strong normality properties*, 329.
Sibner, Lesley M. and Sibner, Robert J. *A maximum principle for compressible flow on a surface*, 103.
Sibner, Robert J. See Sibner, Lesley M.

Smith, F. A. See **Shaprio, H. L.**
